## Projects

- Developed a full-stack e-commerce management system with MERN stack, incorporating key features such as shopping cart functionality, and dynamic product display. Implemented an administrator panel enabling efficient management of coupons, customer messages, register admin and product inventory, resulting in improved operational efficiency.  
Code Link: <https://github.com/aliasghar-codes/Ecommerce-Management-System-Using-MERN-Stack>

- Developed a business solution web application for a client, requirement was to store data locally on a laptop and print receipts for bills, all while maintaining a clean and minimalist user interface. Code Link: <https://github.com/aliasghar-codes/Project-W>
  - Developed a hospital management system using the MERN stack for my university project. I implemented all the necessary features with a modern UI design, with an admin panel. In this application user can send messages, register and can also book appointment while admin can update appointment status, add doctor, see all doctors, add new admin and can also read messages of users.  
Code Link: <https://github.com/aliasghar-codes/Hospital-Management-System-Using-MERN>
  - Developed notes application using the MERN stack along with the Tailwind CSS library. In this application user can read, update, delete, pin and search a note.
